

IRIS Damper

D-IR

Description

IRIS dampers are a solution for fast and exact measurement, balance and control of airflow. IRIS dampers are comprised of a casing, damper blades, an adjustment or regulating nut, and airflow adjustment chart, and airflow taps. Blades and casing are manufactured from galvanized steel. Available in a variety of diameters ranging from 100mm diameter up to 500mm diameter.

Material & Finish

Material: Galvanised Steel
